

COOLANT SYSTEM FLUIDS

# TECHNICAL DATA SHEET

#### **APPLICATION**

Low-conductive, standard temperature, propylene glycol-based coolant fluid designed for closed-loop water cooling systems. For ethylene glycol-based coolants (OSHA/WHMIS controlled), see regular (RTCF), mid (MTCF), and low (LTCF) temperature products.

# **SCF** SAFE COOLING FLUID - STANDARD TEMPERATURE (+5°F/-15°C)

## FEATURES/BENEFITS

Ready to use product eliminates contaminates, chemical additives, and particulates that can damage engineered parts in water-cooled welding systems. Saves money by maximizing water cooler performance and reliability. Eliminates OSHA / WHMIS labeling requirements for labeling for equipment containing ethylene glycol-based cooling fluids. Used in a closed-loop system, WCI<sup>TM</sup> Cooling Fluids are an effective part of a regular preventive water cooler maintenance program.
